Amarile Training Program: what is it?

- ❖ The Amarile Training Program (ATP) is based on **10 years** of experience working with engineers in the E&P field.
- ❖ With the insight of experts from the most **prestigious French engineering schools**, the ATP was conceived and designed to adapt to our users: beginners or advanced
- ❖ Working with more than 1000 RE-Studio users, and providing **regular training sessions**, Amarile's experts have a broad and thorough understanding of the issues at hand
- ❖ The **central purpose** of the program is to create a common workflow in an organization and train engineers to become simulation experts

Amarile Training Program: what benefits?

Financial benefits:

- Saving budget on ECLIPSE® licenses and engineering man power
- Improve Engineers productivity despite turnover

Workflow benefits:

- Streamlined workflow thanks to Project Manager
- Ease Project transitioning between Engineers

Study benefits:

- RE-Studio pushes to focus on Reservoir Engineering
- No more Excel calculations, all the studies are saved and generated within RE-Studio

Analyzing benefit:

- Quick & customizable plotting like no other program
- Management & audit reports generated instantly

Amarile Training Program: what basis?

RE-STUDIO	Benefits	Value Time	Without RE-Studio
For Eclipse	Quality Check your data Only successful Runs Save time on analyzing data deck	From 1 to 2 hours perday	Unique Module, doesn't exist
2D viewer	Quick & Easy plots 100% Editable & Customizable plots Generate Management PowerPoint Reports in one Click	1 hour per day	
PRT viewer	Automatically export and plot: FIP/Production/Well Tables Save time on PRT File analysis Locate and Link errors & problems in the Data Deck	From 1 to 2 hours perday	Unique Module, doesn't exist
Project Manager	Organize all RE's workflow around a common frame Generate Tornado Charts, Sensitivity plots, Objective Functions automatically Support History Matching & Forecast Studies	If managing a few projects: 1-2 hours If managing a big projects: 2-3 hours	Unique Module, doesn't exist
PropsBuilder	Analyze PVT correlations and Relative Perm Automatically update & smooth your graphs Automatically generate props section	30 mins per day	
Schedule Suite	Well Viewer	Saving 2 hours per day	Modern Suit & Latest of its kind
	Well Controls		
	Well Trajectories		
3D viewer	Quick, Powerful & Easy to use Create & Compute functions Design Wells, Import Sector Model Stats Synchronize models, histograms, cross plots	1h30 per day	FloViz, Petrel RE

Support benefits for your company

■ Initiation to RE-Studio & Support

- 5/7 Free support hotline
- Webdemo support
- Face to Face individual support
- Lunch & Learn organization to initiate RE-Studio usage

■ Developments

- At Amarile, we commit to honor our partners' expectations
- For that, it is part of our engagement:
 - Collect feedbacks all year long
 - Make our customers know when their requests will be implemented
 - Develop new modules and features suggested by clients within 1 year

Amarile Training Program

5 Steps to a successful Reservoir Management

- ◆ **Clear understanding of company problematic**
 - ◆ Working on Company Cases
 - ◆ Custom-made features to fit our partners needs
 - ◆ Experts to listen to our partners and give them feedbacks
- ◆ **Working closely with major players of Oil&Gas industry and universities**
 - ◆ Partners in Europe / Middle-East / America / Asia
 - ◆ Universities around the world
- ◆ **Creating a management workflow common to all the different units**
 - ◆ Project Manager
 - ◆ Communication from bottom to top (RE to Management)
- ◆ **Various types of trainings at disposal**
 - ◆ Remote Trainings
 - ◆ Live Individual Trainings
 - ◆ Live Group Trainings
 - ◆ Evaluation of course effectiveness
- ◆ **Most intuitive & user-friendly interface**
 - ◆ All-in-one interface
 - ◆ Modular software

Amarile Training Program

An Advanced Program

- Day 1 – Presentation of Amarile
- Day 1 – Quality Control & Data Management
- Day 2 – Productivity, Data Analysis, 2D Analysis, 3D Analysis
- Day 2 – Workflow Management, Workflow Standardization, Well Management
- Day 3 – New avenues of development
- Day 3 – Case Study

You & Amarile

For your Reservoir Engineers

- Introduction to Amarile's CEO & Expert Reservoir Engineers
- Raise Engineers awareness and knowledge of RE-Studio
- Create a common workflow for Engineers
- Prepare a road map with the features your company will require

For your company's Management

- Discussing future developments and needs of your company
- Discuss future opportunities

Simple but Powerful
